

## FactCite 1-2-3

A collection of articles designed especially for readers in grades 1 to 3. Subjects covered include Biographies, Mythology, Elements, Animals, Simple Machines, Planets, Biomes, States, and Countries. Each article is illustrated and guaranteed to keep your students reading. A "Step Up to a Reading Challenge" feature links each article to an article on the same topic at the next reading level (subscription to those collections required for the Step-up feature). **Designed for grades 1 to 3.**

## Biography for Beginners

More than 700 biographies. Based on the acclaimed Biography for Beginners print series. Includes narrative histories, glossaries, timelines, and illustrations, in one easy-to-search database. Lexile® measures index. Includes a read-along feature to help striving readers reach their potential. **Designed for grades 3 to 7, but also appropriate for striving readers in higher grades.**

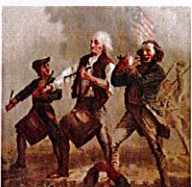

## Essential Biographies

More than 10,000 biographies of famous people from around the world. More than 2,000 illustrations. Includes short dictionary-type entries on minor figures and 2000 to 6000 word illustrated entries on the more heavily researched people. This collection includes SPORTS CHAMPIONS (700+ profiles) and SHAPERS OF SOCIETY (101 profiles). **For grades 4 and up.**

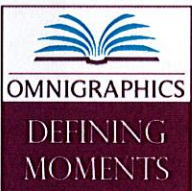

## Mythology

Tales of 760 Greek & Roman gods, goddesses, heroes, places, and events. A multidisciplinary approach connects mythology to art, music, science, literature, and language (word histories and modern usage). Includes hundreds of articles on World Mythology (Hindu, Norse, Chinese, Native American, etc.). **Designed for grades 4 to 12. Now includes an Easy Reading feature for even younger readers.**

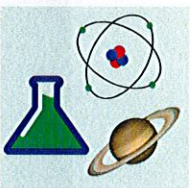

## American History

More than 6,000 illustrated articles on people, places, and events in American history. Includes eras in American history, American Indians, U.S. states, the Presidents, and much more. **For grades 4 and up.**

## Defining Moments in United States History

Includes all 30+ volumes of the acclaimed Defining Moments series from Omnigraphics. Offers in-depth reviews of "moments" that changed the nation and the world. Students will find narrative overviews, primary source documents, more than 1,000 images, biographies, timelines, and glossaries. **Ideal for middle- and high-school social studies and history projects.**

## Science

More than 1,000 web pages and hundreds of images on core K-12 STEM topics: planets, elements, plants, animals, biomes, and more. **For grades 4 and up.**

## Countries and Cultures

Profiles on the countries of the world. Includes extended histories, fast facts, images, economics, foreign affairs, daily life and culture. Also includes a curated list of websites for each country to aid students in their research. **Introductory material is appropriate for students in grades 4 and up. More detailed information appeals to students in higher grades.**

## Essential Information

A go-to source since 1924, now in its 44th print edition. Language, Literature, The Arts, History, Government, Science, and much more! **Designed for upper middle school students to adult learners.**
