

# OPEN JOURNAL FINDER

Simplify Open Access Publishing  
for Researchers and Institutions

**Open Journal Finder (OJF)** is a search-based tool that helps researchers and library staff quickly identify where they can publish Open Access (OA) under their institution's Read & Publish agreements.

By providing a centralized, up-to-date overview of eligible journals and their publishing terms, OJF removes guesswork, reduces manual effort, and streamlines the publishing process.

## KEY FEATURES:

### Searchable Journal Database

Find journals by name or subject instantly

### Public, Up-to-Date Platform

Access the latest journal coverage and OA policies in one place

Search journals by name, subject, publisher, ISSN and more

 <b>Journal of Sport History</b> Royal Society of Sport Science and History	<b>CORNELL UNIVERSITY</b> 1 Articles published 1 Citations made	<b>METRICS</b> Citedness 41.23 H-Index 41.23	<b>APC</b> ⓘ List price ⓘ USD 2,00000 Your price ⓘ USD 1,50000	<b>LIBRARY SUPPORTED</b>

### License & Policy Details

Get clear insights into publishing terms and conditions

### Read & Publish Coverage Indicator

See if a journal is included in an OA agreement

# WHY OPEN JOURNAL FINDER?

Researchers often struggle to determine where they can publish OA and under what terms. OJF offers a quick, user-friendly solution by allowing them to search for journals by name or subject and instantly see:

Whether a journal is covered by their institution's Read & Publish agreements

Applicable publishing terms, including license conditions (e.g., CC-BY)

Clear guidance on OA policies, reducing reliance on librarians for manual checks

## ENHANCING EFFICIENCY AND TRANSPARENCY

By consolidating journal information in a single platform, OJF ensures researchers and institutions can fully leverage Read & Publish deals while improving transparency and compliance with Open Access mandates. OJF transforms the Open Access publishing process—making it faster, easier, and more efficient for everyone involved.

## BENEFITS FOR STAKEHOLDERS

### Researchers:

Gain immediate, self-service access to publishing information, reducing time and effort spent on manual inquiries.

### Librarians:

Minimize repetitive queries and manual lookups, freeing time for strategic tasks.

### Institutions:

Maximize Read & Publish agreements' value, prevent unnecessary costs (double-dipping), and enhance support for OA compliance.
