discover the possibilities

Smartblock

The Smartblock offers a perfect space to work or have meetings in privacy. It has all the amenities of a small meeting room; including full digital capabilities. The Full Digital Smartblock includes a 32" display and integrated speakers for presentations, or videoconferencing, job interviews with video recording, video or slideshow presentations, or conference calls. The Smartblock also comes equipped with USB and HDMI outlets, as well as LED lights with a dimmer. It is the perfect alternative when a large conference room is not required.

The Full Analog Smartblock has all the amenities as the Full Digital, excluding the display and speakers. The Half Analog model has all the amenities of the Full Analog but is the perfect size for small hallways and narrow corridors. All the models come with concealed, lockable wheels for easy moving. The shell of the Smartblock is fully customizable; choose your own colors or add your own logo. It is the perfect area to promote a special program or event. The interior fabric choices are also customizable, choose a color that matches your décor, there are many to choose from.
